To Whom It May Concern:

We are pleased to provide a letter of recommendation to 9dots as a specialist solutions provider for AX. We have worked with 9dots for the past 2 years. So far, the service level and response time has exceeded our expectations. This has been positive for our daily operations.

We worked with Sim on the first phase implementation of AX when he was employed with a large AX vendor. After 9dots was formed, we readily engaged 9dots as our official solutions provider. Since then, we have stabilised the system and successfully implemented the production module which is crucial to our business. In our dealings with 9dots, we have always found Sim to be very forthright and proactive in solving issues. There are very little surprises. In addition, the consulting team in 9dots is also to be commended for their expertise in AX. They are easy to work and communicate with and we remain in contact with most of them on a personal basis.

We have no hesitations to recommend 9dots for any future AX implementations. If you need any more information, do not hesitate to contact us.

Good luck with your AX implementation.

Yours truly,

for Unigold International Pte Ltd

Nico Lee
